Section 12-25 Application

(f) The applicant of a home-based business shall further submit a floor plan of their home, notating the space within their home that is used for business. This use is permitted if compatible with the residential character of the neighborhood, however, in order to promote peace, quiet, and freedom from excessive noise, excessive traffic, nuisance, fire hazard, and other possible effects of commercial uses being conducted in residential areas all home occupations must meet the following additional standards:

1. A home occupation shall be incidental to the use of a dwelling unit for residential uses. No person other than a person residing at the dwelling unit shall be directly involved with or work in the home occupation. If the home occupation employs persons to work at other locations, the dwelling unit shall not be used as an assembly point for any employees who may work at sites outside the dwelling.
2. No alteration of the residential appearance of the premise shall be made, including the creation of a separate entrance to the dwelling or utilization of an existing entrance exclusively for the home occupation.
3. No more than twenty (20) percent of the total floor area of the dwelling unit and garage shall be devoted to the home occupation. A garage shall not be used for a home occupation if such use has the effect of eliminating required parking.
4. The home occupation shall be conducted entirely within the dwelling unit or garage and no stock in trade shall be displayed or visible outside, or stored outside of any building, and no raw materials, tools, or appliances or waste products shall be stored outside of any building.
5. Signs may be used for identification or advertisement of the home occupation, but such signs must be attached flat to structure, may not be larger than one (1) square foot and may not be illuminated.
6. Direct sales to the public shall not be conducted on the premises, provided that off-site orders previously made may be filled on the premises.
7. The use shall not generate traffic in volumes greater than would normally be expected in a residential neighborhood. For purposes of this section, the normal volume of traffic generated by a single-family dwelling shall be defined as twelve (12) vehicle trips to and/or from the dwelling unit per twenty-four (24) hour period. The use shall not use commercial or business vehicles to deliver finished products from the dwelling unit. All parking necessarily generated by the use shall be off the street.
8. The use shall not produce noise, obnoxious odors, vibrations, glare, fumes, or electrical interference detectable to normal sensory perception outside the structure.
9. No toxic, explosive, flammable, combustible, corrosive, radioactive, or other restricted materials may be used or stored on the site.
10. All persons desiring to have a home occupation must first present appropriate plans to the building regulations supervisor detailing how the dwelling will be used or altered to accommodate the use. Thereafter, whenever any permit or license is to be renewed, the dwelling may be inspected to determine how it has been altered to accommodate use.
